

COLE HOLLAND COLLEGE

# Medical Assistant Program

If you want to talk about a great career in health care, you have to talk about Medical Assisting. It is one of the fastest growing careers in health care in Utah and the U.S. The Utah Department of Workforce Service says: "This occupation is expected to experience faster than average employment growth with a high volume of annual job openings." (<https://jobs.utah.gov/jsp/wi/utalmis/reempfullrept.do?soccode=319092&oititle=Medical%20Assistants#proj>).

Cole Holland College offers an accredited Medical Assistant program far below the cost of most other schools in Utah – yet, we enjoy high placement rates and even higher student satisfaction. Maybe this stems from our unrelenting commitment to student success?

Our Medical Assistant program is 60 weeks – and classes are held at night so you can continue to work during the day. We offer free tutoring, job placement assistance, an unheard of opportunity to learn anatomy and physiology by attending a human cadaver lab, discount bus and Trax passes and we provide the best medical assistant education this side of anywhere.

The working conditions for Medical Assistants is excellent too; mostly working in hospitals, doctor's offices or clinics, with a normal work-week and often with benefits like paid time off and health insurance.

With a strong commitment to skills training, our students graduate with the confidence they need to land a job fast and to provide both administrative and clinical skills. Some of our graduates work at IHC, Huntsman Cancer Institute, Vincent Surgical Arts, Granger Medical and more.
